Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 10 October 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-12 is/are pending in the application.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1 – 5, 7, 8, 10 – 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Yun et al. (USPAB 2004/0063237).
3. Yu et al. teach a process, comprising:
 - performing certain process steps from the top side of a substrate carrying a plurality of devices, at least certain of the devices having a micro-machined mesh (fig. 1);
 - attaching a carrier wafer (wafer 2) to the top of the substrate (fig. 2),
 - reducing the thickness of the substrate (fig. 3);
 - continuing the process of fabricating the plurality of devices from the backside of the substrate (figs. 4, 5); and
 - releasing the micro-machined meshes from the topside of the substrate (paragraphs 51 & 37);

wherein said performing includes forming and patterning a layer of resist (paragraph 53);

wherein said performing includes forming a plurality of meshes (fig. 1);

wherein said continuing includes forming vent holes (fig. 4);

attaching a carrier wafer (fig. 5, wafer 3) to the backside of the substrate and removing the carrier wafer from the topside of the substrate (fig. 6); and

wherein the device is a MEMS device (paragraph 40).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 6 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yun et al. (USPAB 2004/0063237) in view of Rice (US Patent 6624003).

7. Yun et al. teach the features previously outlined, but lack singulating the plurality of devices.
8. However, Rice teaches singulating a plurality of MEMS devices formed a substrate (col. 3 lines 6 - 16).
9. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to singulate the plurality of MEMS devices for application in circuits.

Response to Arguments

10. Applicant's arguments and declaration, filed May 18, 2006, have been fully considered, are moot in view of the new ground(s) of rejection.
